

FRIATOOLS®

Always the right decision:

FRIATOOLS®
Scraper Tools for pipe
ends made from HDPE

FWSG 63, FWSG 225 and FWSG 710 L/S

All at a glance

FWSG 63

For pipes
d 20 to d 63

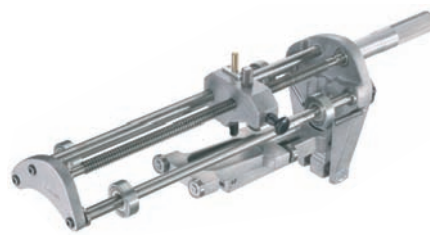

- Support rollers and guide rollers provide stability and prevent tilting on the pipe

FWSG 225

For pipes
d 75 to d 225

- A telescopic lever system and clamp carriage provide safe and optimum guidance on the pipe

FWSG 710 L/S

For pipes
d 250 to d 710

- The FWSG 710 L enables the scraping of the whole or half length of the coupler
- An alternative is the scraper tool FWSG 710 S for the scraping of spigot saddles and pipes limited to maximum half length of the coupler d 710

All unit types:

- For the safe removal of the oxidic layer from PE 80, PE 100 and PE-Xa pipes
- Automatic compensation of pipe ovalities and tolerances
- Consistent swarf removal due to spring mounted scraper blade and automatic feed
- Scraper blade made from tungsten carbide resulting in long service life (long life-span)
- Easy handling, only low force required
- Delivery includes replacement blade in practical aluminium transport case
